## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In particular, the phrase "about parallel to upper arm pendulum means for each lower arm" is unclear. The examiner will assume that the device comprises a pair of pendulum means that are about parallel to respective upper arms of a user to expedite the prosecution.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Chee (5,086,762).

2. As to claim 1, Chee discloses a device comprising a pair of pendulum means (130) that are about parallel to respective upper arms of a user, a frontal protrusion means (142) that ensures each pendulum means is about parallel to each respective upper arms (see Fig. 5). Note the language in the preamble merely states that intended use; thus it is given no patentable weight.
